**V. Read the following passage. Decide if the statements from 1 to 4 are True or False and choose the correct answer (A, B, C or D) for the questions 5 and 6.**

Air pollution is a serious problem in many cities. Motor vehicles, factories and other sources create so much air pollution that it may hang in the air like dirty fog. Air pollution threatens the health of the people who live in cities. City wastes cause water pollution when *they* are poured into the waterways. These wastes kill fish and make some areas unfit for swimming. In addition, many large cities have difficulties in disposing of their garbage. The amount of garbage grows each year, but places to put it are quickly filling up. Citizens, governments, industries, scientists, and business people must work together in different ways to gradually reduce pollution. For example, most cities have introduced recycling programmers.

**A. Write True or False for the following statements.**

- Motor vehicles and factories are among some sources of air pollution.
- Air pollution does not endanger people 's health in some cities.
- Garbage disposal is a problem in many large cities.
- We can reduce pollution by recycling programmers only.
